

FURUTECH

HiFi Choice (UK) – ADL Esprit Product
Introduction
July 2012

Control peek

Furutech's new Alpha Design Labs Esprit is a versatile little switching unit...

The new Esprit is Furutech's latest take on its award-winning GT40 USB DAC. Designed around a 24-bit/192kHz Wolfson WM8716 DAC and the CIRRUS LOGIC CS5361 24/192 analogue-to-digital convertor, the Esprit features optical, coaxial, USB and two analogue inputs. The USB output can be used for recording to hard disk

and the S/PDIF output will support digital surround sound formats. A headphone amplifier, capable of driving any 'phones with an impedance of 16 to 600 ohms, completes the package.

No drivers are necessary with Mac and Linux computers, while a single standard driver is required for Windows computers.

PRICE: £835 **AVAILABLE:** NOW **CONTACT:** 01276 501 392 **WEB:** FURUTECH.COM
