

FURUTECH

What HiFi (UK) – ADL Alpha Line 1

March 2011

INTERCONNECTS **FIRST TESTS**

Furutech Alpha-line | I'connect | £80 Furutech polishes rough sonic edges

If you're looking for ways to try and tame an overenthusiastic hi-fi, or even if you just fancy an interconnect upgrade, these are a great shout.

They promote a free-flowing and hugely enjoyable sound. If your current soundstage sounds a little loose and disorganised, these can help to snap everything back into place. Their structured, focused approach gives notes a greater sense of definition and clarity, while their even tonal balance ensures a balanced sound. Impressive.

Rating ★★★★★

An interconnect for owners of midrange systems to get excited by
